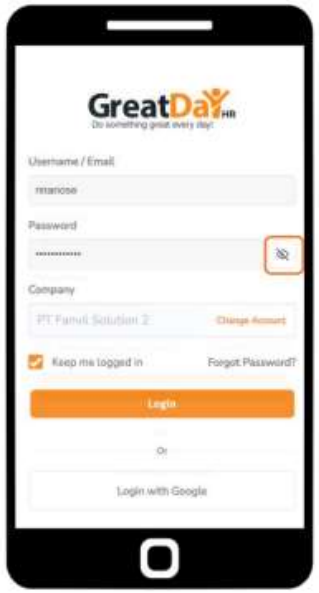
ACCESS



- Admin Access – SunFish Platform (Configuration)
- Employee Access - GreatDay App (User Interface)

CONFIGURATION

- **Assessment Notes (AN)** – All configuration is based on the AN provided and finalized during the implementation phase.

- **Charge Request Form (CRF)** – To revise/update the said configuration, changes will need to go through this to document the request. The request will then be assessed based on the the impact of the needed change, manhours/man days to have this completed and the necessary cost.

VALUE-ADDED SERVICES

Strategic Module

Performance Management

Boost Business Growth While Supporting Employees Performance

Excellent performance management system aligning teams to meet their strategic objectives to reach higher organizational goals. GreatDay HR is fully-personalized to help you oversee your employee's performance.

Recruitment Management

Hiring Process Becomes More Efficient and Less Prone to Human Errors

Shifting through mountains of resumes will surely give the recruiters a headache. It's administratively, extremely time consuming. We go a step further by automating manual tasks and making filtering suitable candidates uncomplicated.

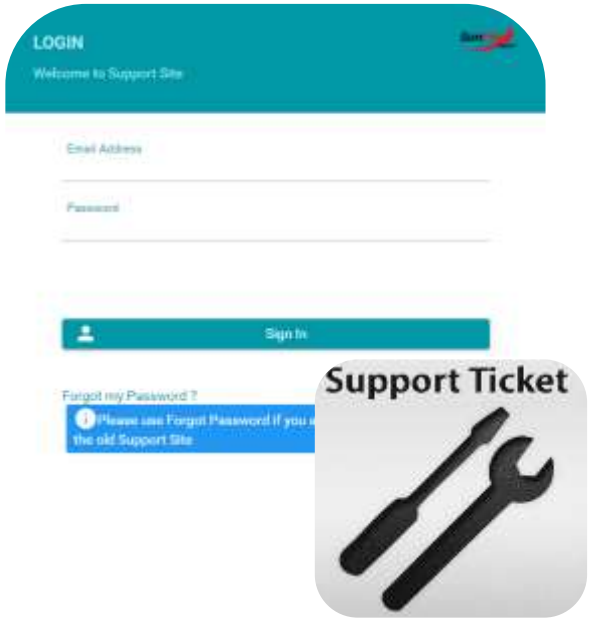
COMMUNICATION METHODS

- Important Updates
- Reminders, Job Aids
- License Validity/ Follow-ups
- Contract Renewal Follow-ups
- Catch-up/ Discovery Meetings

- Important Updates
- Reminders, Job Aids
- Supplement ticket raised

- Web-based
- Raise issues/concern/queries
- Follow-up/Update on issue raised
- Root cause and resolution
- Job-aid attachments

TICKETING TOOL



- Web based. Link: https://sfsupport.dataon.com/login
- All faults/issue encountered should be raised through the **ticketing tool.**
- Details of the issue raised should be included to save time going back & forth and for the immediate investigation of the issue. Refrain from doing any modification/ manual intervention prior to raising ticket.
- Tracking of reported issue logs and resolution provided will be much easier.
- Basic analytics can be viewed from here and this will used to measure the assigned support's productivity.
- All tickets created outside of the business hours will be attended the next business day.
